

Want to write open source code? Looking for a summer job? Would you like to do both at once?

Yes, you can! Just apply for the Google Summer of Code 2008 to work on Haiku, a new and exciting open source operating system for personal computing.

- Help develop Haiku, a new and exciting OS
- Immerse yourself in the open source world
- Work with experienced free software developers
- Get paid a USD\$4500 stipend!
